1. Indications of Vasopressin are following

- (a) Diabetes mellitus
- (b) Hypertension
- (c) Pituitary diabetes insipidus
- (d) Incomplete abortion

1. Indications of Vasopressin are following

(a) Diabetes mellitus

(b) Hypertension

(c) Pituitary diabetes insipidus

(d) Incomplete abortion

Vasopressin is used to treat diabetes insipidus by regulating water retention in the kidneys.

2. Which of the following drug is similar to Acarbose in classification

- (a) Tolbutamide
- (b) Glipizide
- (c) Miglitol
- (d) Pioglitazone

2. Which of the following drug is similar to Acarbose in classification

- (a) Tolbutamide
- (b) Glipizide
- (c) Miglitol**
- (d) Pioglitazone

Both Acarbose and Miglitol are alpha-glucosidase inhibitors used to manage blood sugar levels in diabetes.

3. Glucocorticoids have the following effects EXCEPT

- (a) Stimulation of immune responses**
- (b) Resistance to stress**
- (c) Protein breakdown and glucose formation**
- (d) Lipolysis**

3. Glucocorticoids have the following effects **EXCEPT**

- (a) Stimulation of immune responses**
- (b) Resistance to stress**
- (c) Protein breakdown and glucose formation**
- (d) Lipolysis**

Glucocorticoids increase stress resistance, promote protein breakdown to generate glucose, and cause fat breakdown.

4. Which contraceptive pill is recommended for the women feeding babies

- (a) Combined oral contraceptive pill
- (b) Progesterone only pills
- (c) Once a month pill
- (d) Emergency pill

4. Which contraceptive pill is recommended for the women feeding babies

- (a) Combined oral contraceptive pill
- (b) Progesterone only pills**
- (c) Once a month pill
- (d) Emergency pill

Progesterone-only pills are preferred during breastfeeding as they do not affect milk production.

5. Which among the following birth control pills have low risk of thrombosis

- (a) Norgestrel
- (b) Norgestimate
- (c) Drospirenone
- (d) Levonorgestrel

5. Which among the following birth control pills have low risk of thrombosis

- (a) Norgestrel
- (b) Norgestimate**
- (c) Drospirenone
- (d) Levonorgestrel

Norgestimate is associated with a lower risk of thrombosis compared to other contraceptive agents.

6. The injectable contraceptive is

- (a) Ethisterone
- (b) Progesterone
- (c) Depo Medroxyprogesterone
- (d) None of these

6. The injectable contraceptive is

(a) Ethisterone

(b) Progesterone

(c) Depo Medroxyprogesterone

(d) None of these

Depo-Provera is an injectable form of birth control that contains medroxyprogesterone.

7. Betamethasone and prednisolone are used in

- (a) Infection
- (b) Inflammation
- (c) Ulcer
- (d) None of these

7. Betamethasone and prednisolone are used in

- (a) Infection
- (b) Inflammation**
- (c) Ulcer
- (d) None of these

Both are glucocorticoids used to reduce inflammation in various conditions.

8. Which of the following is used in the treatment of Addison's disease

- (a) Steroid
- (b) Statin
- (c) Sulfasalazine
- (d) Sulfonylureas

8. Which of the following is used in the treatment of Addison's disease

- (a) Steroid
- (b) Statin
- (c) Sulfasalazine
- (d) Sulfonylureas

Steroids are prescribed to replace deficient hormones in Addison's disease.

9. All of the given drug can decrease the effectiveness of oral contraceptives EXCEPT

- (a) Enalapril
- (b) Rifampicin
- (c) Tetracycline
- (d) Phenobarbital

9. All of the given drug can decrease the effectiveness of oral contraceptives EXCEPT

- (a) Enalapril
- (b) Rifampicin
- (c) Tetracycline
- (d) Phenobarbital

Enalapril, unlike rifampicin or tetracyclines, does not interfere with oral contraceptives.

10. Which is NOT a side effect associated with corticosteroid treatment

- (a) Skeletal muscle weakness
- (b) Sodium retention
- (c) Lower resistance to infection
- (d) Hypoglycemia

10. Which is NOT a side effect associated with corticosteroid treatment

- (a) Skeletal muscle weakness
- (b) Sodium retention
- (c) Lower resistance to infection
- (d) Hypoglycemia**

Corticosteroids generally increase blood sugar, so hypoglycemia is not a common side effect.

11. Glucocorticoids are involved in

- (a) Fluid balance
- (b) Potassium metabolism
- (c) Fat metabolism
- (d) Sodium metabolism

11. Glucocorticoids are involved in

- (a) Fluid balance
- (b) Potassium metabolism
- (c) Fat metabolism**
- (d) Sodium metabolism

Glucocorticoids influence fat metabolism by promoting the breakdown of fats (lipolysis).

12. Anabolic steroids mainly act upon the

- (a) Central Nervous System
- (b) Digestive system
- (c) Respiratory system
- (d) Muscular system

12. Anabolic steroids mainly act upon the

(a) Central Nervous System

(b) Digestive system

(c) Respiratory system

(d) Muscular system

Anabolic steroids primarily affect the muscular system, enhancing muscle growth and strength.

13. Which of the following is anti-estrogen

- (a) Tibolone
- (b) Clomiphene
- (c) Letrozole
- (d) Mifepristone

13. Which of the following is anti-estrogen

- (a) Tibolone
- (b) Clomiphene**
- (c) Letrozole
- (d) Mifepristone

Clomiphene is an anti-estrogen drug used in treating infertility by stimulating ovulation.

14. Centchroman belongs to which category of drugs

- (a) Oral anticoagulant
- (b) Oral contraceptive
- (c) Oral antidiabetic
- (d) Oral hematinic

14. Centchroman belongs to which category of drugs

- (a) Oral anticoagulant
- (b) Oral contraceptive**
- (c) Oral antidiabetic
- (d) Oral hematinic

Centchroman (also called Saheli) is a non-hormonal oral contraceptive used in India.

15. Which of the following is NOT used as a contraceptive method

- (a) Intrauterine copper devices
- (b) Combined oestrogen progesterone pills
- (c) Female condoms
- (d) Follicular Stimulation Hormone (FSH) pills

15. Which of the following is NOT used as a contraceptive method

- (a) Intrauterine copper devices
- (b) Combined oestrogen progesterone pills
- (c) Female condoms
- (d) Follicular Stimulation Hormone (FSH) pills**

FSH pills are not used for contraception but rather for stimulating ovarian follicle development in infertility treatment.

16. Which of the following is NOT a natural female sex hormone

- (a) Mestranol**
- (b) Estradiol**
- (c) Estrone**
- (d) Estriol**

16. Which of the following is NOT a natural female sex hormone

- (a) Mestranol
- (b) Estradiol
- (c) Estrone
- (d) Estriol

Mestranol is a synthetic estrogen, unlike estradiol, estrone, and estriol, which are natural female sex hormones.

17. Which of the following is a female sex hormone

- (a) Stilbesterol
- (b) Testosterone
- (c) Estrogen
- (d) Benzestrol

17. Which of the following is a female sex hormone

- (a) Stilbesterol
- (b) Testosterone
- (c) Estrogen
- (d) Benzestrol

Estrogen is a key female sex hormone involved in reproductive and sexual health.

18. Mechanism of action for Sildenafil used in erectile dysfunction is

- (a) Angiotensin converting enzyme inhibitor
- (b) Phosphodiesterase V inhibitor
- (c) HMG CoA inhibitor
- (d) Cholinesterase inhibitor

18. Mechanism of action for Sildenafil used in erectile dysfunction is

- (a) Angiotensin converting enzyme inhibitor
- (b) Phosphodiesterase V inhibitor**
- (c) HMG CoA inhibitor
- (d) Cholinesterase inhibitor

Sildenafil works by inhibiting PDE5, which leads to increased blood flow to the penis, helping treat erectile dysfunction.

19. Oral contraceptive failure in Rifampicin therapy is due to their

- (a) Decreased excretion
- (b) Increased absorption
- (c) Increased metabolism
- (d) Inhibition of cyst formation

19. Oral contraceptive failure in Rifampicin therapy is due to their

- (a) Decreased excretion
- (b) Increased absorption
- (c) Increased metabolism**
- (d) Inhibition of cyst formation

Rifampicin increases the metabolism of oral contraceptives, reducing their effectiveness.

20 . Sulfonylureas act by

- (a) Decreasing glucagon secretion from pancreas
- (b) Decreasing insulin secretion from pancreas
- (c) Increasing gluconeogenesis
- (d) Increasing insulin secretion from pancreas

20 . Sulfonylureas act by

- (a) Decreasing glucagon secretion from pancreas
- (b) Decreasing insulin secretion from pancreas
- (c) Increasing gluconeogenesis
- (d) Increasing insulin secretion from pancreas**

Sulfonylureas increase insulin release from pancreatic beta cells, helping to control blood sugar in diabetes.

21. Which one of the following is NOT used in the treatment of diabetes insipidus

- (a) Indomethacin**
- (b) Ketoconazole**
- (c) Amiloride**
- (d) Vasopressin**

21. Which one of the following is NOT used in the treatment of diabetes insipidus

- (a) Indomethacin
- (b) Ketoconazole**
- (c) Amiloride
- (d) Vasopressin

Ketoconazole is an antifungal, not used for diabetes insipidus, which is treated with drugs like vasopressin.

22. Glucocorticoids are used in the treatment of

- (a) Inflammation
- (b) Allergy
- (c) Inflammation and allergy
- (d) Skin infection

22. Glucocorticoids are used in the treatment of

(a) Inflammation

(b) Allergy

(c) Inflammation and allergy

(d) Skin infection

Glucocorticoids are effective in treating inflammation and allergic reactions by suppressing the immune system.

23. Progestins with androgenic effect

- (a) Norgestrel
- (b) Norethynodrel
- (c) Norethisterone
- (d) Ethynodiol diacetate

23. Progestins with androgenic effect

(a) Norgestrel

(b) Norethynodrel

(c) Norethisterone

(d) Ethynodiol diacetate

Norgestrel has androgenic effects, which can influence testosterone-like activity in the body.

24. Which of the following eicosanoids is approved for human clinical use

- (a) Unoprostone**
- (b) Bimatoprost**
- (c) Latanoprost**
- (d) Prostaglandin E2**

24. Which of the following eicosanoids is approved for human clinical use

(a) Unoprostone

(b) Bimatoprost

(c) Latanoprost

(d) Prostaglandin E2

Latanoprost is a prostaglandin analog used to treat glaucoma by reducing intraocular pressure

25. Oral contraceptive exerts their effect primarily

- (a) Preventing fertilization of the egg
- (b) Suppressing ovulation
- (c) Inactivating sperm
- (d) Preventing menses

25. Oral contraceptive exerts their effect primarily

- (a) Preventing fertilization of the egg
- (b) Suppressing ovulation**
- (c) Inactivating sperm
- (d) Preventing menses

Oral contraceptives prevent pregnancy primarily by inhibiting ovulation.

26. Pamidronate is used in

- (a) Paget's disease
- (b) Meniere's disease
- (c) Hodgkin's disease
- (d) Cushing's disease

26. Pamidronate is used in

- (a) Paget's disease
- (b) Meniere's disease
- (c) Hodgkin's disease
- (d) Cushing's disease

A disease that disrupts the replacement of old bone tissue with **new bone tissue**.

Pamidronate is a bisphosphonate used to treat bone disorders like Paget's disease.

27. Antiestrogen used for the treatment of infertility

- (a) Tamoxifen
- (b) Ibuprofen
- (c) Naproxen
- (d) Clomiphene

27. Antiestrogen used for the treatment of infertility

(a) Tamoxifen

(b) Ibuprofen

(c) Naproxen

(d) Clomiphene

Clomiphene is used to treat infertility by inducing ovulation in women.

28. A drug which inhibits spermatogenesis, used as male contraceptive

- (a) Tamoxifen
- (b) Norethindrone
- (c) Levonorgestrel
- (d) Gossypol

28. A drug which inhibits spermatogenesis, used as male contraceptive

- (a) Tamoxifen
- (b) Norethindrone
- (c) Levonorgestrel
- (d) Gossypol**

Gossypol inhibits sperm production and has been studied as a male contraceptive.

29. Chronic administration of glucocorticoids results in all of the following adverse effects EXCEPT

- (a) Hypertension
- (b) Hypokalemia
- (c) Myopathy
- (d) Ocular hypertension

29. Chronic administration of glucocorticoids results in all of the following adverse effects EXCEPT

- (a) Hypertension
- (b) Hypokalemia
- (c) Myopathy
- (d) Ocular hypertension**

Chronic glucocorticoid use can cause many side effects, but ocular hypertension is not a typical one

30. Which of the following is TRUE statement about corticosteroids

- (a) It inhibits lipocortin production
- (b) It inhibits leukotrienes C, and D, synthesis platelet thromboxane A, synthesis
- (c) It inhibits
- (d) It inhibits neutrophil production

30. Which of the following is TRUE statement about corticosteroids

(a) It inhibits lipocortin production

(b) It inhibits leukotrienes, thromboxane synthesis

(c) It inhibits platelet

(d) It inhibits neutrophil production

Corticosteroids inhibit the synthesis of inflammatory mediators like leukotrienes and thromboxanes, which are involved in the inflammatory response

31. Clomiphene is used because it stimulates to treat

- (a) LH secretion
- (b) Follicular development
- (c) Ovulation
- (d) Uterus activity

31. Clomiphene is used because it stimulates to treat

- (a) LH secretion
- (b) Follicular development
- (c) Ovulation**
- (d) Uterus activity

Clomiphene stimulates ovulation, making it useful in the treatment of female infertility by triggering the release of eggs.

32. Isoxsuprine is used to treat

- (a) Asthma
- (b) Severe hypotension
- (c) Nasal congestion
- (d) Premature labor

32. Isoxsuprine is used to treat

- (a) Asthma
- (b) Severe hypotension
- (c) Nasal congestion
- (d) Premature labor**

Isoxsuprine is a beta-adrenergic agonist that relaxes the uterus, helping to delay premature labor.

33. Which of the following drug is used to arrest premature labor

- (a) Phenylephrine**
- (b) Ephedrine**
- (c) Pseudoephedrine**
- (d) Salbutamol**

33. Which of the following drug is used to arrest premature labor

- (a) Phenylephrine
- (b) Ephedrine
- (c) Pseudoephedrine
- (d) Salbutamol**

Salbutamol, a bronchodilator, also acts as a uterine relaxant to prevent premature labor contractions.

34. Oxytocin is secreted from

- (a) Thyroid
- (b) Thymus
- (c) Pituitary
- (d) Adrenal

34. Oxytocin is secreted from

- (a) Thyroid
- (b) Thymus
- (c) Pituitary**
- (d) Adrenal

Oxytocin is produced by the hypothalamus and secreted by the posterior pituitary gland, playing a role in childbirth and lactation.

35. Cortisone is a/an

- (a) Hormone
- (b) Enzyme
- (c) Antibiotic
- (d) Vitamin

35. Cortisone is a/an

(a) Hormone

(b) Enzyme

(c) Antibiotic

(d) Vitamin

Cortisone is a glucocorticoid hormone used to treat inflammation and autoimmune conditions.

36. Which of the following is a hormonal method

- (a) Creams
- (b) Suppository
- (c) Foam
- (d) Mala-D pill

36. Which of the following is a hormonal method

- (a) Creams
- (b) Suppository
- (c) Foam
- (d) Mala-D pill**

The Mala-D pill is a combined oral contraceptive that works by regulating hormone levels to prevent pregnancy.

37. Mobius syndrome is due to

- (a) Mifepristone
- (b) Misoprostol
- (c) Dinoprostone
- (d) Methotrexate

Moebius syndrome is a rare birth defect that mainly affects the muscles that control facial expression and eye movement.

37. Mobius syndrome is due to

(a) Mifepristone

(b) Misoprostol

(c) Dinoprostone

(d) Methotrexate

Misoprostol taken during pregnancy can cause congenital defects such as Mobius syndrome.

38. Which of the following is a potent anti-estrogen derivative

- (a) Mestranol
- (b) Megestrol
- (c) Triamcinolone
- (d) Tamoxifen

38. Which of the following is a potent anti-estrogen derivative

- (a) Mestranol
- (b) Megestrol
- (c) Triamcinolone
- (d) Tamoxifen**

Tamoxifen is a potent anti-estrogen used primarily in the treatment of breast cancer.

39. The primary indication of Tamoxifen citrate is

- (a) Female infertility
- (b) Endometrial carcinoma
- (c) Breast Carcinoma
- (d) Endometriosis

39. The primary indication of Tamoxifen citrate is

- (a) Female infertility
- (b) Endometrial carcinoma
- (c) Breast Carcinoma**
- (d) Endometriosis

Tamoxifen is widely used in the treatment and prevention of breast cancer due to its anti-estrogen effects.

40. Select an endocrine drug which is a steroidal derivative

- (a) Gonadorelin
- (b) Insulin
- (c) Levothyroxine
- (d) Hydrocortisone

40. Select an endocrine drug which is a steroidal derivative

- (a) Gonadorelin
- (b) Insulin
- (c) Levothyroxine
- (d) Hydrocortisone**

Hydrocortisone is a steroidal hormone used in treating conditions like adrenal insufficiency and inflammation.
