Read the passage and answer the given questions.

India has a road network of over 5,472,144 kilometres, the second largest road network in the world. At 1.66 km of roads per square kilometre of land, the quantitative density of India's road network is higher than that of Japan (0.91) and the United States (0.67), and far higher than that of China (0.46), Brazil (0.18) or Russia (0.08). However, qualitatively India's roads are a mix of modern highways and narrow, unpaved roads.

The rural roads in India form a substantial portion of the Indian road network. These roads are in poor shape, affecting the rural population's quality of life and Indian farmers' ability to transfer produce to market post-harvest. Over 30 percent of Indian farmers' harvests spoil post-harvest because of the poor infrastructure. Many rural roads are of poor quality, potholed, and unable to withstand the loads of heavy farm equipment. These roads are also far from the all-season, good quality 2-lane or 4-lane highways, making economic resource flow slow, and logistical costs between different parts of India one of the highest in the world. For the development of these rural roads, Pradhan Mantri Gram Sadak Yojana (or “Prime Minister Rural Roads Scheme”), was launched in December 2000 by the Indian government to provide connectivity to unconnected rural habitations. The scheme envisions that these roads will be constructed and maintained by the village panchayats. In some parts of India, where the government has attempted to manage it directly as a local social spending program, this program has produced limited results and no lasting change over 15 years, in either the quality or quantity of rural road network.

The National Highways are the backbone of the road infrastructure and the major roads in India. They carry most of India's freight and passenger traffic. State highways and major district roads constitute the secondary and interconnecting roads in India.

Expressways make up approximately 1,208 kilometre of India's road network. These high-speed roads are four-lane or six-lane, predominantly access controlled. The 165-kilometre Yamuna Expressway, India's longest six-laned controlled-access opened in August 2012.

The government has drawn up a target to lay 18,637-kilometre network of brand new expressways by 2022. Most of the existing expressways in India are toll roads.

Q.11 'उचित' शब्द _____ है।

Խըէսղիոն ԻՏ 9096115507

दिये गए गद्यांश के आधार पर प्रश्नों के उत्तर दीजिए।
 मूल ग्रीक भाषा में 'लोकतन्त्र' का शाब्दिक अर्थ 'जनता का शासन' है (डिमोस-जनता, क्रेसिया-शासन)। महान अमरीकी राष्ट्रपति श्री. अब्राहम लिंकन के प्रसिद्ध शब्दों में 'लोकतन्त्र वह सरकार है जो जनता की, जनता के लिए और जनता द्वारा चलाई जाती है'। सर्वप्रथम प्राचीन ग्रीस में लोकतन्त्र का उल्लेख मिलता है। किन्तु प्राचीन ग्रीस का लोकतन्त्र आज के लोकतन्त्र की सामान्य धारणा के विपरीत था। उसका स्वरूप सुनिश्चित नहीं था और न ही उसकी कोई आदर्श प्रणाली थी। उसमें केवल बहु व्यक्तियों का शासन था।
